

Building safer and more resilient communities

Chief Executive Seminar – CEO TFEP - APEC Lima, August 14, 2008

Dr. Juan Cueva, Member of the Governing Board, IFRC Mr. Giorgio Ferrario, Regional Representative for South America, IFRC

Ten's, hundred's of Red Cross or Red Cross offices in each country that need to increase their capacities and get closer to the communities.

185 National Societies

Federation Secretariat

• 1 HQ in Geneva

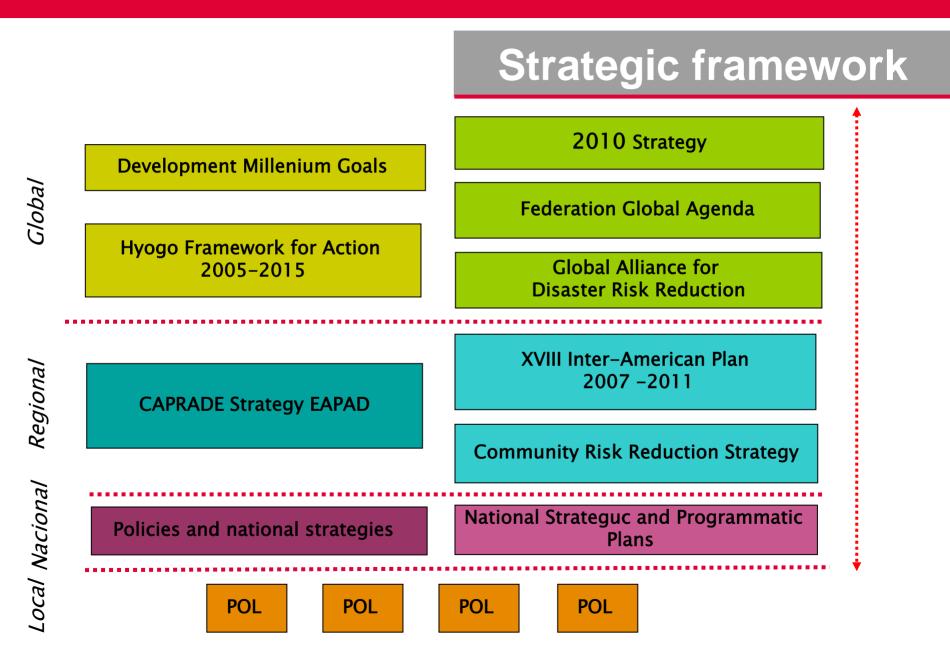

- 7 Zone Offices (1 in America, 3 in Africa, 1 in Europe, 1 en Asia, 1 en Mid West y Northern Africa.
- Regional Representation Offices
- Country Offices
- 3 DM Units (Panamá, Kuala Lumpur and Dubai).

Increase work with the communities and coordination work with local and national authorities.

Our vision:

We strive, through voluntary action, for a world of empowered communities, better able to address human suffering and crises with hope, respect for dignity and a concern for equity

Our mission: To improve the lives of vulnerable people by mobilizing the power of humanity

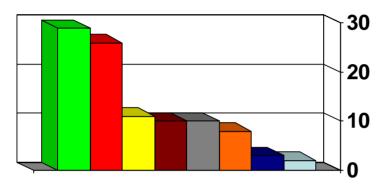

A global agenda

- Reduce the number of deaths, injuries and impact from disasters.
- Reduce the number of deaths, illnesses and impact from diseases and public health emergencies.
- Increase local community, civil society and Red Cross Red Crescent capacity to address the most urgent situations of vulnerability.
- Promote respect for diversity and human dignity, and reduce intolerance, discrimination and social exclusion.

Trends affecting human vulnerability

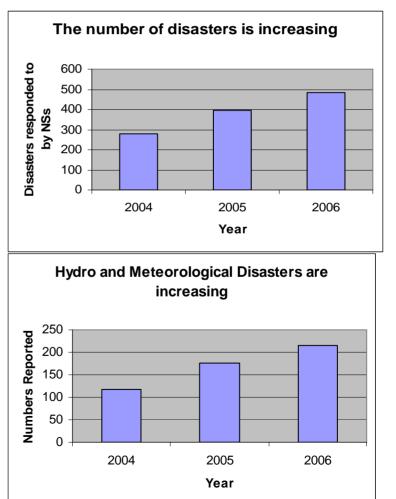

- Climate Change
- Violent conflict (inter and intra-state)
- Disease
- Migration
- Urbanisation
- Natural disasters
- Population growth
- □ Militarisation/privatisation of aid

Figures and trends

Disaster trends reflect these vulnerabilities

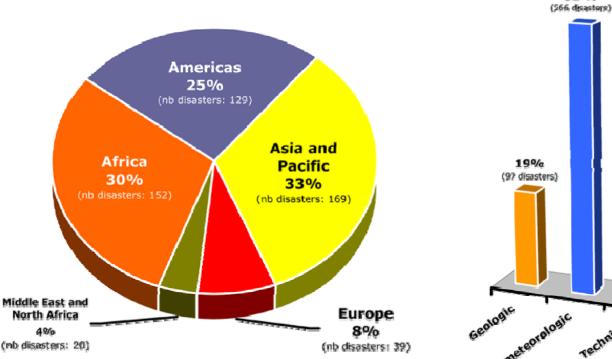

Source: IFRC Operations Support Department, 2007

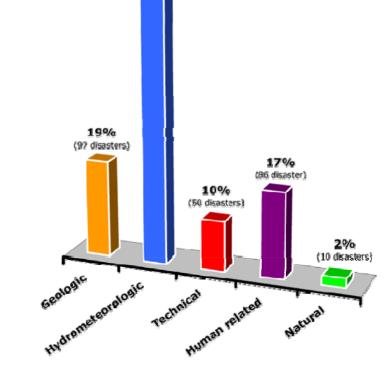

Figures and trends

Red Cross/Red Crescent emergency responses in 2007 by region

Red Cross/Red Crescent emergency responses in 2007 by type of disaster

52 %

Asia Pacific context

- The Asia Pacific region the most disaster-prone region on earth accounting for over sixty percent of the world's disasters
- Natural disasters in Asia Pacific take thousands of lives per year while leaving millions of others homeless and without a source of income feeding into a vicious cycle of poverty.

Figures and trends

 Red Cross/Red Crescent Societies in Asia Pacific, working year round on wide range of DM activities ranging from community based disaster preparedness projects in remote villages to mobilising large scale international emergency response operations.

Tsunami operation

Figures and trends

- At least 226,000 people died
- During the emergency phase of the operation, the Red Cross Red Crescent reached about 1.7 million people, distributing clean water, basic health care, food, and emergency shelter.
- 30,000 volunteers and hundreds of international staff from over 40 national Red Cross and Red Crescent Societies have been involved in the operation.
- Approximately 3.076 billion Swiss francs were donated to Red Cross Red Crescent tsunami appeals

- Over 300 million people affected by disasters in the world every year and the number is likely to increase due to climate change.
- Today eight out of the world's ten most populous cities are prone to earthquakes
- Global Warming will put hundreds of millions of people at increased risk from climate related hazards
- Being better prepared minimizes effects & is less costly than "waiting" for the response (\$1 invested today in disaster risk reduction saves four to seven dollars in future cost of relief and rehabilitation)

Figures and trends

How we contribute to common goals?

Responding together to new trends and increased vulnerabilities strengthening local communities resilience capacities, considering that local communities are the most affected and the first line of response.

The Red Cross / Red Crescent contribution to disaster risk reduction activities starts with participatory planning and builds on community engagement and commitment to build safer and more resilient communities.

Working together with communities

- Understand how communities work is key to understanding resilience and precondition for strengthening people's capacities to cope with and recover from disasters
- Use of that understanding to take decisions to mitigate, prepare for, respond to and recover from the impacts of a disaster in a way which leaves the communities less at risk than before
- Focused on human capacity to face, overcome, and even be strengthened by the adversities of life

Applying an integrated approach and addressing the root causes of vulnerability

 Health issues Drinking water Basic community infrastructure Education, public awareness & social development Basic means of livelihood

Establishing better linkages between Reduction, Relief and Recovery

More efforts on analyzing the range of future hazards and risk.

Disaster Preparedness Disaster Mitigation Risk Disaster Prevention / Previction Prevention / Disaster Prevention / Prevention / Disaster Response

More attention to restoring people's livelihoods into recovery.

Promoting articulation, alliances and coordination at all levels

The Red Cross Red Crescent auxiliary role to the governments offers a unique opportunity to increase coordination with national and local authorities and communities.

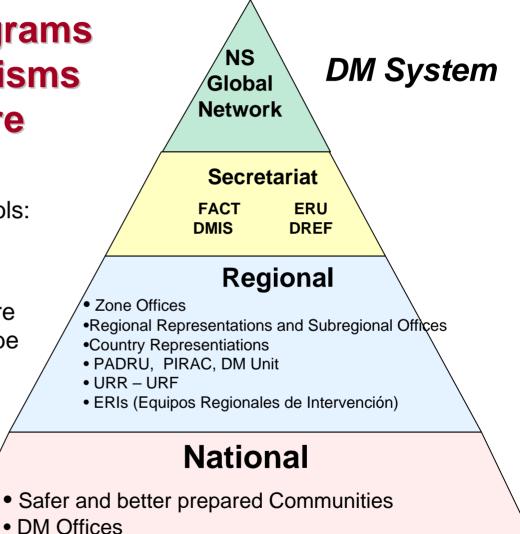

Our presence at all economies facilitates opportunities for increased cooperation among economies, as well as with multilateral and bilateral development partners, international financial organizations and other international and regional bodies, such as World Bank through ProVention Consortium and Global Facility for Disaster Reduction and Recovery, European Commission, DFID.

Implementing programs and using mechanisms and resources more efficiently

•Intervention mechanisms and tools: DM Units, FACT, RDRT, NIT, CBDRT, DREF, ERU

•CBDRR Program: Safer and more resilient communities and Better be Ready

•CBDRR Tools: DPP/DRR indicators, DPP/DRR Toolkit, DesAprender Platform and Region Reference Centers

- NIT National Intervention Teams
- •CBDRT (Community based Disaster Reduction Teams)

RC/RC Movement contribution to the Strategy through:

- Red Cross and Red Crescent National Socities Global Network
- 2. National Societies presence at local level
- 3. Volunteering power
- 4. DM experience as a Movement
- 5. Long term committment for reducing risks and contribute to development.
- 6. Policies and rules to work in disaster situations
- 7. Globally acknowledged emblem

The world-wide lessons from hurricanes; earthquakes; droughts, floods, volcano eruptions; population movement; food insecurity growing impact of climate change and several other neglected disasters are on the increase. Our challenge is work to save more lives & livelihoods.

Thank you –Gracias
